

Lighting Designer

This full-time role is based in Abingdon, Oxfordshire; however, the position can work remotely part time. Reporting to the Head of Design, this person will be responsible for assisting the Sales team in creating lighting designs for single site projects, as well as multi-site rollouts across multiple sectors.

LPA has been in the lighting industry with 30 years' experience in all industry sectors. We have delivered lighting solutions for retail, commercial, education, healthcare, industrial, exterior lighting, and residential sectors. With 10 international offices, we are able supply and offer expertise on projects globally.

This exciting opportunity will suit a collaborative, proactive and highly skilled designer. The candidate will be able to take an approved concept through to design development and completed documentation.

Your duties will include a wide range of items including but not limited to:

- Assisting the Sales team, by taking the lead in design meetings with selected clients for roll out and single site projects
- Creation of new design concepts for brands
- Contribute to establishing lighting concepts and prepare design documentation for creative lighting, ranging from lighting design work to presentations in a variety of sectors, including retail, office space, residential and industrial
- Be responsible for existing brand store roll out designs
- Supporting tenders with solutions for value engineering solutions
- Assist in research and development of products and technology
- Communication with both internal and external stakeholders

General Job Requirements:

- Ensure designs/ documentation complies with lighting codes & standards in the UK and EMEA region.
- Outstanding knowledge and technical experience in lighting design; understanding of lighting, problem solving and attention to detail
- Strong project and time management skills; ability and proven track record to manage multiple large-scale projects from conception to delivery hand over to the Project/ Sales Manager
- Ability to travel for site meetings and focussing in the UK and Europe

Main Skills:

- Proficient in design software(s) such as AutoCAD, Dialux, Relux, Photoshop/ Illustrator, MS Project.
- Ability to communicate ideas and technical information to a wide variety of client types (brand, M&Es, architect, designers, shop fitters)
- Excellent lighting design technical knowledge with 4+ years' experience in the same field.
- Design/Engineering Degree
- Ability to do hand sketching; high creative approach/mindset.

Nice to Haves:

- BIM/Revit knowledge
- DMX/Dali programming knowledge
- Lighting integration with smart controls
- 2nd language

Location: Abingdon / Part Remote Working

Benefits: Private health care
