LIGHTING  
AND ENERGY  
SOLUTIONS

## SMITH

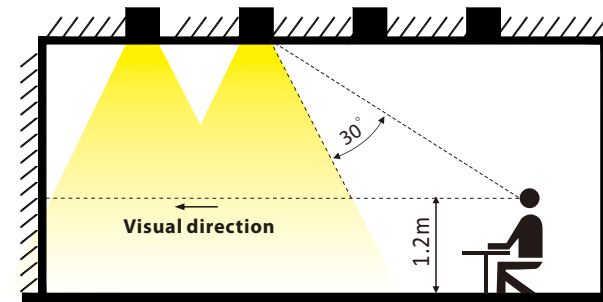

Smith is a low-glare compact luminaire for lower-level and more precise accenting. The same LED module is used to create more than 20 different luminaires. This modular range and interchangeable components promote a sustainable approach for replacements and maintenance. The components allow for customisation and flexibility in the design. Available as an adjustable or fixed downlight with a selection of narrower beam settings, they are perfect for highlighting key elements of your design.

Energy efficiency is a key component of our product focus and Smith will ensure significant energy savings over traditional solutions. Available front reflector colours are silver, gold, white and black with the option of an anti-glare lens or honeycomb louvre.

Besides providing the traditional single CCT COB, we can also adopt a dim to warm COB, which can achieve a variable colour temperature from 1800K to 3000K. The luminaires light output will be changed from 8% at 1800K

Anti-glare accessories can be added or removed from the luminaire. When using anti-glare accessories, the UGR is below 12.

The LED module can work with different luminaires according to different applications

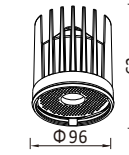

Recessed module for spot light

- 2700K/3000K/3500K/4000K/5000K
- CRI:>80, >90, >95
- WH/BK/GR
- 230V 50Hz
- Aluminium/PC

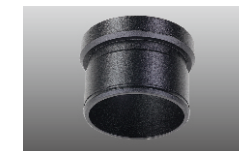

IP 20

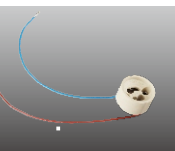

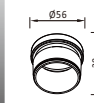

Model	Source Power	System Power	Source Lumen	System Efficiency	Beam Angle/System Lumen	CRI	Source	Qty/Ctn
